

RESVERATROL

BioG-Max Resveratrol Nanosphere Delivery System with Sunflower-Derived Phospholipids 1.7 oz, Precision Pump-top

Biogenetix's BioG-Max Resveratrol Nanosphere Delivery System Biogenetix's BioG-Max Resveratrol Nanosphere Delivery System brings the power of intravenous therapy into a convenient oral delivery. Our delivery system improves upon common liposomal technology with smaller, more stable, single-layer spheres made from the highest-grade ingredients available. In addition to exceptional absorption rates, nanospheres like these have demonstrated the ability to cross the blood-brain barrier, deposit their cargo intracellularly and enter lymphatic circulation.

Additionally, the phospholipids that compose the nanosphere shell feed the cell membranes. This ensures the proper function for the absorption of nutrients and therefore greatly enhances bioavailability.

Resveratrol (3,4',5-trihydroxystilbene) belongs to a class of polyphenolic compounds called stilbenes. Resveratrol is found in grapes,

wine, grape juice, peanuts, cocoa, and berries of *Vaccinium* species, including blueberries, bilberries, and cranberries. Since the early 1990s, when the presence of resveratrol in red wine was established, the scientific community has been exploring the effects of resveratrol on health. Resveratrol has been shown to support Cardiovascular Health, Immune Function, Inflammation, Neuroprotection, as well as other biological processes.

Biogenetix's BioG-Max Resveratrol Nanosphere Delivery System protects the resveratrol from digestive enzymes that otherwise limit or prevent the absorption of oral resveratrol supplementation.

Biogenetix's BioG-Max Resveratrol comes with a precision pump to accurately deliver 15 mg of nanoemulsified resveratrol and 70 mg of injectable-grade essential phospholipids per 2 pumps. Each bottle delivers 50, 1.0-ml doses.

Production Technology Features:

- Tightly controlled small sizing, verified by Laser Dynamic Light Scattering on each batch
Biogenetix's BioG-Max Resveratrol has a mean size of 20nm
- *BioG-Max Resveratrol* offers a pleasant taste suitable for intra-buccal delivery
- Precise Pump Delivery
- Easy Water Dispersability when desired

Benefits:

- Supports Cardiovascular Health
- Anti-inflammatory properties
- Supports immune function
- Supports blood vessel health
- Neuro-protective properties
- Supports healthy aging
- Intraoral delivery for best systemic availability
- Easy to dispense and take directly from bottle

Suggested Usage:

For general use consider taking 1-4 pumps (2 pumps is 1.0 ml) or more 2-4 times per day directly by mouth between cheek and gum. Hold 60 seconds before swallowing. May also be stirred into water. Best taken on an empty stomach at least 10 minutes before a meal.

Supplement Facts

Serving Size: 2 pumps (1 mL)
Servings Per Container: 50

	Amount per Serving	% Daily Value
Resveratrol	15mg	†
Essential Phospholipids (from purified sunflower lecithin)	70mg	†

† Daily Value not established.

Other Ingredients: Glycerin, Water, Ethanol, Medium Chain Triglycerides, Vitamin E (as d-alpha tocopheryl polyethylene glycol 1000 succinate and as Natural Mixed Tocopherols).
