

Neuropathy Support Bundle

Inside-Out Plug-and-Play Nutrition Support

The Biogenetix Neuropathy Support Bundle can be used as part of a healthy lifestyle to promote proper function in the face of degenerative neuropathic changes. Neuropathy can be a progressive degenerative process associated with a broad spectrum of metabolic changes, both lifestyle and environmentally induced. Making healthy lifestyle choices remains key for patient progress and using the Neuropathy Support Bundle to bolster the body's ability to clean up offending oxidative stress is an ideal way to move forward.

KEY ASPECTS TO THE BIOGENETIX APPROACH INCLUDE:

- **Super G Antioxidant** – powerful combination of NAC and Glutathione
- **BioG-Max B12** – liposome-protected methylcobalamin for maximum absorption
- **BioG-Max NAD+** – optimal building blocks for rapid NAD+ creation, delivered in proprietary liposomal technology

The statements herein have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, reverse, cure, or prevent any disease.

Biogenetix[™]
Nutrition Uncompromised

KEY COMPONENTS

Super G Antioxidant acts as the main driver of antioxidant activity targeting the root oxidative stress mechanism present in the clinical presentation of neuropathy/neuropathic pain. BioG-Max B12 pairs with the antioxidant effects of Super G to short circuit vitamin insufficiency related neuropathic changes. Lastly, the oxidative stress vacuuming capacity of NAD+ is potently delivered through our proprietary liposomal mechanism for maximum efficiency and targeted results. The Neuropathy Support Bundle is a three pronged approach at supporting your body's innate healing response from the inside out, using state of the art delivery technology that can be paired with regen and laser intervention or act as a stand-alone therapeutic approach.

30-DAY SUPPLY INCLUDES:

- 2 Super G Antioxidant
- 2 BioG-Max B12
- 2 BioG-Max NAD+

SUGGESTED 30-DAY STRATEGY

Doses taken **3 times per day** with breakfast, lunch and dinner.

Super G Antioxidant:

2 caps with meals for week 1,
1 capsule for weeks 2-4

BioG-Max B12:

2 pumps with meals (30 days)

BioG-Max NAD+:

2 pumps with meals (25 days)

Some products may finish before others.
Continue dosage strategy until products
are complete.

Super G Antioxidant:

A unique formula that not only provides the powerful antioxidant properties of glutathione but also provides the key ingredients required for the synthesis and recycling of glutathione.

- Supports adrenal function
- Supports the body's ability to protect against oxidative damage
- Supports healthy moods
- Supports memory and cognition
- Supports normal cortisol levels

BioG-Max NAD+:

Support metabolism, energy, and brain health with NAD+ - one of the body's chief "anti-aging" molecules. NAD+ is found in every cell of your body and involved in hundreds of processes surrounding healthy metabolism and optimal mitochondrial function. Because NAD+ levels drastically decline with age and exposure to the standard American lifestyle, BioG-Max NAD+ is a timely fit as part of an optimal lifestyle program. BioG-Max NAD+ pairs well with the Biogenetix Metabolic Clearing Kit and can be added seamlessly into any of the Biogenetix Plug-N-Play interventions.

- Supports optimal mitochondrial function.
- Promotes ideal levels of neurologic inflammation.
- Supports optimal ATP-energy production.
- Promotes decreased levels of oxidative stress.

BioG-Max B12:

Vitamin B12 is an essential water-soluble nutrient for the normal function of several body systems, including the cardiovascular, nervous, and digestive systems. It also helps support liver function and the detoxification process.

A diet without adequate B12 can adversely affect the production of basic building blocks, like RNA and DNA, but also the production of red blood cells.

Research shows that many people can have difficulties metabolizing and absorbing B-12, especially when digestive and/or intestinal functioning is suboptimal.

For these people, intravenous therapy or intraoral liposomal delivery are the best methods for achieving rapid shifts in blood levels of this key nutrient.

Take your neuropathy results a step
further by adding the Biogenetix
Neuropathy Support Bundle to your
patients' protocols.
