

GI ResQ

Enhanced Gastrointestinal Support

PRODUCT BENEFITS

- Supports gastrointestinal health
- Enhanced production of short-chain fatty acids
- Promotes healthy immune response
- Supports ideal microbial balance

GI ResQ features four specialized ingredients for enhanced gastrointestinal support. This unique formula contains a concentrated extract of licorice that has been processed to remove glycyrrhizin—thus reducing risk of side effects associated with licorice. Glutamine serves as the predominant fuel and nitrogen source for the mucosal lining of the gastrointestinal (GI) tract. Arabinogalactan from the North American larch tree is a naturally occurring polysaccharide that provides excellent support for GI health. Research suggests that arabinogalactan plays a role in the promotion of gut microflora and may increase beneficial short-chain fatty acid production. The Aloe vera leaf extract in GlutAloeMine has been processed to remove the bitter principles and prevent a laxative effect.

KEY INGREDIENTS

L-Glutamine, the most abundant free form amino acid in the body, is very important for maintaining gastrointestinal and stimulated immune cell functioning. It is an important transporter of nitrogen (and carbon) in the body and therefore, is vital in wound healing. Although glutamine can be synthesized by the intestinal mucosa, during periods of physiological stress when needs can not likely be met by the body alone, gut epithelial atrophy, ulceration and even necrosis are possible.^[1] L-glutamine is metabolized to ammonia and glutamate.

Arabinogalactan, a polysaccharide derived from the Larch tree, contributes fermentable fiber to this formula in addition to having immuno-stimulatory properties. It minimizes ammonia synthesis and absorption, enhances production of short chain fatty acids and increases the gut microflora population.^[2]

Licorice Root Extract 10:1 (deglycyrrhized) is a concentrated extract that has been processed to remove glycyrrhizin, thus eliminating any risk of licorice-associated side effects. It is anti-inflammatory, antispasmodic and has laxative and soothing effects. Aspirin-induced mucosal damage has been shown to be reduced by administration of deglycyrrhized licorice.^[3]

Aloe Leaf Extract (standardized to 50% polysaccharides), used for thousands of years, is perhaps most well-known for healing of damaged epithelial tissue, including the bowel lining. Despite the lack of scientific published studies there is anecdotal evidence to suggest that aloe vera helps inflammatory conditions of the gastrointestinal tract. In some individuals it may increase G.I. transit time, improve protein digestion and absorption, increase stool bulk and normalize stool bacteria where high levels of yeasts previously existed.^[4] The aloe extract used in GlutAloeMine® does not have a laxative effect because the bitter principles have been removed.

SUPPLEMENT FACTS

Serving size: 1 Scoop (about 5.8 g) Servings per container: 60	Amount Per Serving	% Daily Value
Calories	5	
Total Carbohydrate	2 g	1%
Dietary Fiber	1 g	4%
Sodium (naturally occurring)	5 g	<1%
L-Glutamine	3 g	**
Arabinogalactan (from Larix laricina)(heartwood)	2 g	**
Deglycyrrhized Licorice 10:1 Aqueous Extract (Glycyrrhiza glabra)(root)	500 mg	**
Aloe Vera 200:1 Aqueous Extract (Aloe barbadensis)(leaf gel)	100 mg	**

Daily Values based on a 2,000 calorie diet

** Daily Value Not Established

Other Ingredients: Stevia leaf extract.

Does Not Contain: Wheat, gluten, yeast, soy, animal or dairy products, fish, shellfish, peanuts, tree nuts, egg, ingredients derived from genetically modified organisms (GMOs), artificial colors, or artificial sweeteners

DIRECTIONS FOR USE

Mix one scoop in 2-4 oz water once daily, or as directed by your health care practitioner.

Consult your health care practitioner prior to use. Individuals taking medication should discuss potential interactions with their healthcare practitioner. Do not use if tamper seal is damaged.

STORAGE

Keep closed in a cool, dry place out of reach of children.
