D3K2 Liquid

Supports Healthy Vitamin D Levels

Biogenetix
Nutrition Uncompromised

PRODUCT BENEFITS*

- **Support healthy vitamin D levels***
- **Promote the dampening of arterial calcium build up***
- **Promote proper blood sugar metabolism and insulin receptor site sensitivity***
- **Support healthy immune system***

Vitamin D has been shown in an ever-growing body of literature to support disease prevention and the maintenance of optimal health. Biogenetix D3K2 is a concentrated, synergistically blended Vitamin D/Vitamin K formula for optimal absorption. Research suggests that if Vitamin D is to be dosed at therapeutic levels, Vitamin K is absolutely critical in proper application. Vitamin K has the all-important role of promoting proper Vitamin D utilization without causing calcification of muscles, arteries, or veins. Biogenetix uses natural Vitamin K2, called MK-7, for optimal results.

D3K2 provides a concentrated dosage of Vitamin D blended with a complimentary balance of Vitamin K2. Healthy vitamin D levels in the body support numerous areas including: blood sugar metabolism, bone health, immune health, cardiovascular health, autoimmune responses, neurodegenerative disorders, and many more.

SUPPLEMENT FACTS

Serving size: 2 Drops (.1mL) Servings per container: 290	Amount Per Serving	% Daily Value
Vitamin D (as cholecalciferol)	50 mcg (2000 IU)	250%
Vitamin K2 (natural vitamin K2 as MK-7)	72 mcg	**

** Daily Value Not Established

Other Ingredients: MCT oil (medium chain triglyceride oil from coconut).

Manufactured in the USA with thoughtfully-sourced global ingredients.

DIRECTIONS FOR USE

Shake well before using. Take 2 drops once a day, or as directed by your health care professional.

Consult your health care professional before use if pregnant, nursing, taking medication, or for any use by minors. Do not use if safety seal is broken or missing. Keep out of reach of children.

STORAGE

Store in a cool dry area and away from direct sunlight.
