

Glucose Support Bundle

A targeted approach designed to support health glucose metabolism as part of an ongoing health lifestyle.

The Biogenetix Glucose Support Bundle is designed to be implemented after completion of the 21-Day Metabolic Clearing Protocol, or similar programs, for those patients requiring further metabolic support. Once toxic burden has been addressed and ongoing lifestyle foundations are in place, this protocol helps reinforce healthy glucose metabolism, insulin signaling, and cellular resilience.

PROMOTING METABOLIC RESILIENCE BY:

- Supporting optimal glucose utilization
- Targeted antioxidant protection
- Promoting insulin receptor sensitivity
- Promoting mitochondrial function and cellular resilience

Implement a structured, Phase 2 metabolic strategy that supports healthy glucose regulation, insulin sensitivity, antioxidant capacity, and cellular recovery.

Biogenetix: Glucose Support Bundle

KEY COMPONENTS Each product in the Glucose Support Bundle delivers a targeted element within a comprehensive Phase 2 metabolic strategy.

Botanical and antioxidant support to promote healthy glucose utilization and antioxidant balance.

Monoglyceride-form fish oil designed for enhanced bioavailability and up to 3X greater EPA/DHA uptake.

A targeted nutrient complex formulated to enhance insulin receptor responsiveness and support efficient cellular glucose uptake.

Glutathione-focused antioxidant support with key nutrients involved in synthesis, recycling, and mitochondrial protection.

SUGGESTED STRATEGY

- Berberine-ALA:** 1 per meal
- Glucostatic Balance:** 1 per meal
- Effecsulin:** 1 per meal
- Super G Antioxidant:** 1 per meal

INCLUDES:

- 1 Berberine-ALA
- 1 Glucostatic Balance
- 1 Effecsulin
- 1 Super G Antioxidant
